

Groundwater, Groundwater

Written by Byron Morton/ Images Puppet Productions Inc. 2013

Verse One

Let me tell you something that's important don't you see
It's all about groundwater
And how to keep it free

From polluters that pollute the lakes
The rivers and the ground
To get into our water wells
Not keeping them real sound

We need our groundwater as clean as it can be
Se we can have freshwater
Right here for you and me

So don't you pour harsh chemicals
Or bad things on the ground
That seep into our water wells
Not keeping them real sound

Chorus:

Groundwater
Groundwater
We need groundwater
Groundwater
Groundwater
Cool clean groundwater

Verse 2:

Water enters in the ground
Through rain and winter's snow
And lays between the rocks
Till we turn on the flow

We need to have our water
As clean as it can be
Cause everyone needs water
In your community

Chorus:

Groundwater
Groundwater
We need groundwater

Groundwater
Groundwater
Cool clean groundwater

Verse 3:

Let me tell you something that's important don't you see
It's all about groundwater
And how to keep it free

From polluters that pollute that lakes
The rivers and the ground
That get into our water wells
Not keeping them real sound

Chorus:

Groundwater
Groundwater
We need groundwater
Groundwater
Groundwater
Cool clean groundwater

Groundwater
Groundwater
Cool clean groundwater
We need groundwater
Cool clean groundwater
